BRUCE WORKS LLC

PROPERTY ACCOUNTABILITY · SOPS + TRAINING · WORKFLOW TOOLS

CAPABILITY STATEMENT

SBA SDVOSB / VOSB · CA DVBE / SB(MICRO)
SAM ACTIVE · UEI N7YPC6B6YNC5 · CAGE 246J3

CORE CAPABILITY

Bruce Works LLC is an owner-operated, service-disabled veteran-owned small business in San Diego. We count and reconcile inventory and property, write SOPs, continuity packages and training, build small workflow tools and dashboards, and provide administrative support.

Every job is fixed to concrete deliverables, measurable acceptance criteria and a clean handoff to your staff.

SERVICE LANES

- **Property + inventory accountability:** physical inventories, asset tagging, reconciliation to the property record, custody and discrepancy documentation, excess and turn-in paperwork, and records cleanup.
- **SOPs, continuity + training:** process maps, SOPs and desk guides, continuity (COOP) packages, training materials, and instructor-led or recorded training.
- **Workflow tools + dashboards:** intake and tracking tools, dashboards, approved automation, knowledge bases and simple websites, each with acceptance criteria and a staff handoff.
- **Administrative support:** data entry and validation, document preparation, records processing and digitization prep, scheduling, and status reporting, remote or onsite.

KEY PERSONNEL

- **Jonathan Bruce, Owner:** U.S. Marine Corps veteran (logistics). Since 2019, supply and property accountability for seven field sites holding about $3.19M in assets.
- Designed, built and runs the firm's own operations system: bid tracking, customer records, finance and document workflows.

DIFFERENTIATORS

- Eligible for SDVOSB and VOSB set-asides and sole-source awards; California DVBE / SB(Micro) for DVBE participation and the SB/DVBE Option.
- Owner-operated: the person who quotes the job does the job, start to finish.
- Fixed-price quotes with clear deliverables, sized for small purchases and quick-turn tasks.
- Remote delivery anywhere; onsite in San Diego County, and elsewhere with travel.

DELIVERY APPROACH

- Confirm the outcome, the deliverables and how they'll be accepted.
- Do the work in short, checkable steps with status reports.
- Document, train, hand off, and support the first weeks of use.
